EVF was founded in Lyon, France in 2000. The objective is to develop education, scientific knowledge, research and clinical expertise of the highest quality and establish standards in the field of venous disease. The EVF is under the auspices of the Union Internationale de Phlébologie and the International Union of Angiology. Membership is wide and open to anyone who has an interest in the field irrespective of medical discipline.

**evf HOW Plus**

**What is evf HOW Plus?**

During EVF HOW workshop, learners frequently ask for the possibility to receive more in-depth instructions about the details of various procedures in clinical practice. To continue the goal to provide education in venous disease the EVF HOW Plus courses are created to offer an opportunity to improve various skill sets for venous therapeutic. Click here for further general information.

**Main Objective**

To ensure sufficient skills by providing detailed knowledge, simulator training and apprenticeship in a clinical setting to reinforce the use of a procedure.

**Pre-requisites for learners to attend evf HOW Plus:**

The learner should have:

- preferably attended the EVF HOWs on Workshop;
- basic basic embolization skills such as experience of DUS-guided access, placing of sheaths, handling guidewires and catheters, intra-interventional use of DUS etc. before training in percutaneous procedures;
- basic experience of surgeons of extraction of arteries and veins before training in open venous procedures.

If interested to be involved and to be included when new courses are available, please contact Daniel Böck.

**How is evf HOW Plus courses structured?**

**Duration:** Short duration (2-3 days).  
**Number of learners:** Depending on type of course, max 4 - max 10.  
**Topic of instruction:** to provide in-depth education in various disease may vary depending on type of course:

- Prefabricated lectures should be few and limited, if possible
- Discussions on defined didactic case reports should replace presentations. The clinical cases should be selected with the aim to support the objectives of the course, and to introduce the local clinical cases to be treated.
- Simulator training, if available.
- Interventions in the OR, and vascular suite in office environment. Learners will follow the instructions during the interventions on investigation of real time patients. Learners will be given the opportunity to assist during open percutaneous interventions, discuss tips and tricks, and observe procedural details.
- Post-intervention discussion on accuracy of preoperative diagnosis, correctness of the indications to intervene and choice of procedure. Post-operative care and need and type follow-up will be discussed.
- Additional material including videos will be available on this website, evf.org, which will make it possible for the learner to return to the discussed cases and demonstrated interventions to enhance their education in venous diseases.

**Note:** The learner will be given a certificate of attendance of the course, which in no way assume or certifies any competence to perform this procedure.

**Type of procedure courses of evf HOW Plus to be planned:**

- Duplex Ultrasound Investigation
- Reinforcement Innovative Device Techniques
- Sophisticated and Non-invasive Vein Treatment
